EDUCATION

COMSATS University Islamabad, Sahiwal Campus <i>Bachelor of Science in Computer Science</i>	Sahiwal, Pakistan Sep 2023 – Sep 2027 (<i>Expected</i>)
District Public School and College <i>Intermediate (Pre-Medical)</i>	Okara, Pakistan 2021 – 2023
District Public School and College <i>Matriculation</i>	Okara, Pakistan 2019 – 2021

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), Dart, SQL, Java, C++
Web Technologies: React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, REST APIs, MERN Stack
Mobile Development: Flutter, Dart, Firebase Authentication, Firestore, GetX, MVVM Architecture
AI / Machine Learning: TensorFlow, Keras, scikit-learn, CNN, BiLSTM, Multi-Head Attention, Federated Learning, Classification, Data Preprocessing, Model Evaluation, Explainable AI
Computer Vision & OCR: YOLOv5, YOLOv8, OpenCV, EasyOCR, Tesseract OCR
Data Science & Visualization: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Streamlit
Databases: MongoDB, MySQL, Firebase Firestore, NoSQL Databases
Tools & Platforms: Git, GitHub, Google Colab, VS Code, Linux, Firebase
Design: Figma, Canva, UI/UX Prototyping, Graphic Design

PROJECTS

Chicken House ERP & Digital Ordering Platform <i>MERN Stack, TypeScript, Socket.IO</i>	2026
- Designed, developed, and deployed a full-stack restaurant ERP and digital ordering platform with menu browsing, product customization, cart management, checkout, order tracking, table bookings, event bookings, customer reviews, and career applications. - Implemented role-based dashboards for Admin, Manager, HR, Rider, Staff, and Customer, covering orders, menu management, inventory, finance, attendance, leave, payroll, shifts, promotions, analytics, bookings, and rider assignments. - Developed secure REST APIs using Node.js, Express.js, and MongoDB with authentication, role-based access control, server-side validation, and real-time updates using Socket.IO. Live Demo: chicken-house-rust.vercel.app	
AI-Based Security Surveillance System <i>Python, YOLOv8, OpenCV, EasyOCR, Streamlit</i>	2025
- Developed a real-time computer vision system to process webcam and CCTV feeds using YOLOv8 for weapon and suspicious activity detection. - Integrated OCR-based license plate recognition and built a Streamlit dashboard for alerts, snapshots, and security monitoring.	
Evenora – Smart Learning App <i>Flutter, Dart, Firebase, GetX, MVVM</i>	2025
- Built a cross-platform learning application with course categories, video lectures, notes, quizzes, bookmarks, and progress tracking. - Implemented Firebase Authentication and Firestore with GetX state management using MVVM architecture.	
LoanIQ – ML-Powered Loan Prediction System <i>Python, Scikit-learn, Pandas</i>	2026
Built a supervised machine learning model to predict loan approval outcomes using data preprocessing, feature engineering, classification, and model evaluation.	
Eventora – Event Management Website <i>HTML5, CSS3, JavaScript</i>	2025
Created a responsive multi-page event management website with dynamic user interface components optimized for mobile and desktop screens.	

- Designed a normalized relational database schema and implemented SQL queries for patient records, appointments, staff management, and billing operations.

CERTIFICATIONS & TRAINING

Project Ideas Expo SP6

COMSATS Skill Development Society

Certificate of Participation

May 2026

- Participated in Project Ideas Expo SP6, demonstrating project ideation, presentation, and innovation-focused problem-solving skills.

Graphic Design with Figma

Hunarmand Punjab Program

UI/UX Design, Prototyping, Visual Design

2024

- Completed a professional Figma course and designed an interactive travel website prototype with user flows and responsive layouts.
